

HPE ProLiant ML10 Gen9 Server

Secure, collaborate, and provision

Best-fit for:

- Small to midsize businesses (SMBs)
- Small/home offices (SOHOs)

Ideal workloads:

- File, print, and business applications
- Collaboration (email/workgroup)

A quiet, compact server for your home or small business

If you're looking to improve efficiency and productivity in your small business or home office, look no further. The HPE ML10 Gen9 Server provides server-level performance in a quiet, compact size that is easy to deploy in your home or small business. Its affordable price will help you make the leap from workstation solutions to your first server. Right-sized performance and easy expandability help to deliver the required workloads, along with features that decrease the risk of data loss.

Better performance at the right cost

The workstation-oriented design of the HPE ProLiant ML10 Gen9 Server provides better performance, powered by just the right amount of processing, storage, memory, and networking to run essential shared applications with the efficiency and expandability required by your business. You'll also like the low acquisition costs and easy-to-use server management software that lets you focus on your business, not managing your server environment.

Powered by the latest Intel® processors, the HPE ProLiant ML10 Gen9 Server gives you great compute power in a 4U/1P tower model, making it the ideal choice for workloads such as file and print, business apps, and collaboration.
